DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last
Office action is persuasive and, therefore, the finality of that action is withdrawn.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Omum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 10, 19, 28 and 29 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 8, 11, 18, 21, 24, 27 and 35 of U.S. Patent No. 7,130,281 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because "discovering a plurality of packet-based telephony devices within an acoustic space, initializing the

packet-based telephony devices to participate in a communication session for the exchange of packet-based audio communications between participants of the communication session, generating an output stream comprising a plurality of packets each including digitally encoded audio, calculating a time for play out of a selected one of the packets, providing the output stream to the packet-based telephony devices and commanding each of the packet-based audio devices to output the audio from the selected packet at the calculated time". These limitations are not patentability distinct from the patent above.

Claims 2-9, 11-18, 20-27 are rejected for being dependent of the independent claims above.

Response to Arguments

 Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald Gauthier whose telephone number is (571) 272-7539. The examiner can normally be reached on 8:00 AM to 4:30 PM. Application/Control Number: 10/630,515 Page 4
